ABOUT CMT

Counter Measures Technologies Pvt Ltd (CMT), for over a decade has been a trusted supplier of world-class arms, ammunition, and special equipments to Defence Forces, Central Armed Police Forces and State Police Forces. CMT is proud to invest in manufacturing capacity for arms, ammunition, and equipment under the Make-In-India initiative.

CMT's manufacturing unit is on par with global standards for Defence manufacturing. Sprawling over 10 acres of the 300 acres earmarked for the Joint Task Facility on a highly secure real estate at Tiruvallur District, Tamil Nadu, part of the Tamil Nadu Defence Industrial Corridor, the Battle Arms Division is now home for the manufacture & proof test of several calibres of Small Arms & Ammunition.

Manufacturing & assembly lines with state-of-the-art machinery, robust quality controls of both "Man & Machine" ensure every firearm produced supersedes any contemporaries made in India. In-house Proof Testing ensures all Small Arms and Ammunition departing production lines are tested to global standards.

CMT-JTF is ideally located in Tamil Nadu Defence Corridor & the Tamil Nadu State Govt (Industries Ministry), has signed an MoU with CMT for the production of Small Arms & Ammunition, one of its first in the State.

Our customer base includes valid Indian Arms License Holders -from farmers to celebrities, sport personalities, professionals such as doctors, lawyers, engineers, media personalities, businessmen/women to business tycoons, professional shooters, eminent awardees, pilots, bureaucrats, police personnel, politicians & so on.

For the commercial Indian market & as per Arms Act 2016, CMT offers, Indian market for Self Defence/Protection and the shooter fraternity a wide array of calibres such as .22, .357, .380, .40 & .45 with Compact, Sub Compact, Full Frame and Slim Line Pistols as per needs and requirements of an individual license holder for the purpose of "Concealed Carry".

Individuals have a choice to choose from our production models that fits their lifestyle & budget. CMT's goal is to provide affordable handguns that are reliable to defend themselves and to defend those who cannot defend themselves.

CMT GLOCK 42, the smallest pistol in our catalogue is an ideal choice of self defence for women, it fits into a purse and is one of the best options for Concealed Carry. The concealed presence of a G42 offers enormous confidence to Indian women to make strides in their careers or lives, no matter whatever surprises life has to offer.

CMT-GLOCK have been delivering 9mm pistols to the Indian Armed Forces for a long time now & CMT-GLOCK pistols evidently have superseded the expectations of the Govt and end users nationwide. Now CMT-GLOCK JV extends it's sale into the commercial market with the same promise of "Confidence is What You Carry".

FACILITY

GLOCK

Safe Action System

TRIGGER SAFETY

The trigger safety is the first safety in the firing sequence. It's incorporated into the trigger in the form of a lever and when it's engaged blocks the trigger from moving rearward. To fire the pistol, the trigger safety and the trigger itself must be deliberately depressed at the same time. If the trigger safety is not depressed, the trigger will not move rearwards and allow the pistol to fire. The trigger safety is designed to prevent the pistol from firing if its dropped or the trigger is subjected to any pressure that isn't a direct firing pull.

Warning: If the trigger is in the forward position the pistol may be loaded

FIRING PIN SAFETY

The second safety, the firing pin safety, mechanically drops the firing pin from moving forward in the ready to fire condition.

As the trigger is pulled rearward, the trigger bar pushes the firing pin safety up and frees the firing pin channel. If you decide not to fire and release the trigger, the firing pin safety automatically re-engages

DROP SAFETY

The final safety involves the trigger bar, which rests on the safety ramp within the trigger mechanism housing.

The trigger bar engages the rear portion of the firing pin and prevents the firing pin from moving forward.

As the trigger is pulled rearward, the trigger bar lowers down the safety ramp and allows the release of the firing pin.

After firing, the trigger bar moves upwards and re-engages the firing pin.

As the trigger is released, all safeties automatically re-engage.

G25

COMPACT | .380 AUTO

CMT GLOCK 25

Because of its small dimensions equal to those of the GLOCK 19, the GLOCK 25 in the low-recoil .380 caliber can be comfortably carried and concealed.
